

Highmark January 2026: **Formulary Deletions**

Formulary Deletions: Highmark is updating its prescription drug formularies, effective January 1, 2026. Certain medications will be removed or moved to a higher tier on our Commercial and Healthcare Reform formularies.

Why? Highmark wants to make sure our members get safe and cost-effective treatment options. We regularly review the most current research and make necessary adjustments to formularies for member safety and cost effectiveness.

What This Means

- **What Happens?** Impacted members and their providers were mailed a letter. To ensure the members receive the maximum prescription drug coverage, the available formulary drug alternatives for each impacted medication will be sent to the members and providers, should they be clinically appropriate.
- **Closed Formulary Considerations:** Members with a closed formulary may have their doctor submit a non-formulary request to continue taking the same medication, or will be responsible for the full cost of the medication.
- **Incentive Formulary Considerations:** Members with an incentive formulary will have an increased cost-share on the medication as it moves to a non-preferred tier.
- **Important Considerations:** Highmark values the well-being of our members and look forward to continuing to meet their health coverage needs. Member Service is available for benefit-related questions.

Key Updates – Visualized: Formulary Deletions Table

To make the information digestible, here is a breakdown of what's changing.
