

Physical therapy services available April 27th

If you're dealing with chronic and acute strains and injuries in the neck, back, arms and legs, we're here to get you moving again.

Your board-certified physical therapist has the education, skills and expertise to get you feeling like your normal self, while reducing or eliminating your pain. We'll evaluate your condition, provide education on how to self-manage your condition and offer therapy techniques to aid in your recovery.

Services

- Worksite physical therapy, screening and wellness assessments
- Treatment for acute and chronic injury care, pain management, strengthening and conditioning
- Prevention-based assessments, general worksite and ergonomic evaluation
