

# Preventive Care Services

A Guide for Employees  
and Members

# An ounce of prevention is worth a pound of cure.

Getting preventive care is one of the most important steps you can take to manage your health. Routine preventive care can identify and address risk factors before they lead to illness. It's important to work with your primary care provider (PCP), who can help you follow these guidelines and coordinate plans of care to manage your health.

# Preventive Care Services

**The screenings and immunizations listed in this summary include services required by the Affordable Care Act (ACA).**

Non-grandfathered health plans<sup>1</sup> must cover these routine immunizations and other services recommended by the United States Preventive Services Task Force A or B, and by other organizations such as Bright Futures, endorsed by the American Academy of Pediatrics.

If these services are performed by a network provider, you cannot be charged a copay, coinsurance or deductible. Out-of-network charges may apply if the services are performed by a non-network provider.

Please be aware that some services may be subject to age, gender or other restrictions. In addition, some prescription drugs or services may be subject to medical management techniques, such as prior authorization, quantity limits, etc. We encourage you to refer to USPreventiveServicesTaskForce.org or Healthcare.gov for more detailed information.

If you have questions about these recommended screenings and immunizations or need help finding a PCP in your network, please call Customer Care at the number on your ID card.

<b>Adult Preventive Care</b>	
<b>Preventive Physical Exams and Screening Tests</b>	
<ul style="list-style-type: none"> <li>■ Abdominal aortic aneurysm screening</li> <li>■ Anxiety screening</li> <li>■ Blood pressure screening</li> <li>■ Cholesterol and lipid level screening</li> <li>■ Colorectal cancer screening</li> <li>■ Depression screening</li> <li>■ Diabetes screening</li> </ul>	<ul style="list-style-type: none"> <li>■ Hepatitis B screening if at high risk for infections</li> <li>■ Hepatitis C screening</li> <li>■ HIV screening and associated services</li> <li>■ Latent Tuberculosis Screening</li> <li>■ Screening and counseling for sexually transmitted infections</li> <li>■ Screening for lung cancer</li> </ul>

#### **Please Note**

This is a summary of the Affordable Care Act Preventive Care requirements and is not intended to be an exhaustive list. This list is subject to change upon issuance of additional regulations or guidance. The preventive care services listed on this flyer are for your information only. They are not intended to be, and should not substitute for, professional medical advice, diagnosis or treatment from your treating medical professional. Decisions about care need to be individualized and should be made in concert with treating medical professionals. The information provided does not establish or imply coverage for any particular treatment or service. Any recommended treatment or services will be determined based on your eligibility and coverage under the specific terms and conditions of your benefit plan.

#### **Footnotes**

- 1 If you do not know your health plan's grandfathered status, contact our Customer Care Center at the number on your identification card.
- 2 To receive 100 percent coverage for these medications (i.e., no out-of-pocket cost), members must get a prescription from their healthcare provider and present it at the pharmacy, even if the medication is available over the counter without a prescription.
